

**GEORGIA BOARD FOR PHYSICIAN WORKFORCE  
2014 GEORGIA PHYSICIAN WORKFORCE  
DATA BOOK**

Primary Care/Core Specialties  
Based on 2012-2013 Renewal Licensure Data

## Acknowledgements

The report was produced under the direction of Cherri Tucker, Former Executive Director, Melissa Carter, Statistical Research Analyst; contributing staff, Olive Jones-Golden, Pam Smith, Yvette Speight, Megan Tucker; interns Nusaiba Mubarak, Brittany Taylor, Leah Youngblood; and consultant G.E. Alan Dever, MD PhD.

The Board would like to thank the Georgia Composite Medical Board for providing physician license renewal data.

This document is provided on behalf of Chairperson Mark G. Hanly, MD and Executive Director LaSharn Hughes.

## Executive Summary

The 2014 Physician Workforce Profile marks the 32nd year the Georgia Board for Physician Workforce (GBPW) has examined the supply and distribution of Georgia's physicians using data from license renewals. The physician data is analyzed by the GBPW and the resulting information is then reported on a biennial basis. This information is important in determining trends in workforce patterns (i.e. demographics, specialty, and geographical location) and to better assess the healthcare needs of Georgia's citizens. All data presented is based on the full time equivalent formula adopted in 2015.

- Georgia has 160.5 physicians per 100,000 population. (All physician specialties)
- In 2014, women comprised 30.3% of all physicians in Georgia. This is a 2.7% increase since 2010
- Over two thirds (69.7%) of Georgia physicians in 2014 were men
- Black physicians were the second largest racial category of physicians in Georgia, with a slight increase from 13.1% in 2010 to 14.9% in 2014
- The physician workforce is aging, as the largest age category of all physicians in Georgia is 65 and above (15.4%)
- Since 2006 the percentage of the physicians below the age of 40 decreased by 50%
- In 2014, 56.9% of all active Georgia physicians were age 50 and older. This is a 4.2% increase from 2010
- 10.8% of all family medicine physicians intend to retire in the next 5 years
- The largest age category for family medicine physicians is 65 and above (19.5%)
- Women constitute over half (61.1%) of pediatric physicians, and represent nearly half (46.4%) of the OB/GYN physician population. Women were the least represented in general surgery, constituting only 10.4% of the general surgery physician population
- Of the six primary care/core specialties (family medicine, pediatrics, internal medicine, OB/GYN, general surgery, and emergency medicine), general surgery had the largest percent (64.3%) of physicians age 50 and older. Family medicine physicians had the second largest percentage (58.8%) of physicians age 50 and older
- The percentage of physicians that accept Medicaid has increased approximately 5% since 2010

**THE METHODOLOGIES FOR GEORGIA PHYSICIAN WORKFORCE CHANGED WITH THE ADDITION OF THE FULL-TIME EQUIVALENT FORMULA IN THE 2014 REPORT. GBPW ADVISES CAUTION BE TAKEN WHEN DIRECT COMPARISONS ARE MADE USING WORKFORCE NUMBERS PROVIDED IN PREVIOUS REPORTS.**

## Methods

At the end of Georgia Composite Medical Board physician license renewal application is a non-obligatory physician survey. The data from this survey is compiled and used by the Georgia Board for Physician Workforce to report on the supply and distribution of physicians in Georgia.

All physicians licensed in Georgia but not practicing in one of the 159 counties in Georgia are removed from the data set. The data set does not identify physicians who practice telemedicine. Next, physicians who are not actively practicing patient care are removed from the data set. Finally, all retired physicians are removed from the data set. (Chart below shows impact of listed steps)

The data is then cleaned validating consistency of physician self reported zip codes and counties of practice. This is done due to many of Georgia counties also having cities in Georgia with the same name. The data is then cleaned ensuring consistent coding for each variable.

Chart 1

Step-by-Step How Data is Filtered

After the data has been cleaned a full time equivalence (FTE) formula was applied.

The FTE formula was created based on the Health Resources and Services Administration (HRSA) FTE formula to determine physician population based on hours worked.

The FTE formula used:

- 40 hours = 1.0 FTE
- A provider serving more than 40 hours is considered 1 FTE
- Total provider FTE is rounded up to the nearest 1 percent
- The hours of physicians working in multiple counties FTE is distributed between counties of practice based on number of hours practiced in each county.

Impact of FTE Formula:

Chart 2

Impact of FTE Formula

The distribution of physicians per 100,000 was then calculated by county and by primary care service areas. Basic demographic statistics were calculated.

# Georgia Metropolitan Statistical Areas (MSA) and Non-Metropolitan Statistical Areas (Non-MSA)\*

Map 1\*\*

In the United States, a geographical area with relatively high population density at its core and close economic ties through the area is called a Metropolitan Statistical Area (MSA). Transversely, an area with low population density and little economic ties to surrounding areas is called a Non-Metropolitan Statistical Area (Non-MSA).

\*All MSAs are in color. Non-MSAs have no color.

\*\*Map provided by Policom Corporation Economic Analysis Everyone Understands 2011:  
<http://www.policom.com/PDF%20MET-MICRO/GAMET.pdf>

## MSA and Non-MSA Demographics

Table 1

MSA and Non-MSA FTE, Population, and Rate per 100,000			
	Total FTE	Population*	Rate per 100,000
MSA	13,923.7	7,958,511	175.0
Non-MSA	1,994.5	1,961,434	101.7

\*2012 U.S. Census Data

- There are 41.8% more physicians per 100,000 population in MSAs than in Non-MSAs

- 58% of physicians in MSAs are above the age of 50
- 64.3% of physicians in Non-MSAs are above the age of 50
- The two largest age categories of MSAs are 45-49 and 55-59, both are 15.3%
- The two largest age categories of Non-MSAs are 60-64 at 15.8% and 65 and above at 20.2%

Chart 3 MSA and Non-MSA Age Distribution

Chart 4

### MSA and Non-MSA Race Distribution of All Active Physicians

- There are 8.5% more White physicians in Non-MSAs
- There are 22.1% more minority physicians in Non-MSAs than in MSAs
- There are 4.2% more Black physicians practicing in MSAs than in Non-MSAs

## MSA and Non-MSA Gender Distribution

- There are 10.5% more male physicians in Non-MSAs than in MSAs
- There are 26.3% more female physicians in MSAs than in Non-MSAs
- 51.2% of Georgia's population are women while they only make up 31.2% of physicians in MSAs and 23% of physicians in Non-MSAs

Chart 5

## MSA and Non-MSA Medicaid and Medicare

Chart 6

### Accept Medicaid and Medicare Patients

- 77.4% of physicians in MSAs accept Medicaid, while 89.7% of Non-MSAs physicians accept Medicaid patients
- Non-MSAs accept more Medicare patients (88.7%) than MSAs (83.1%). Similarly, Non-MSAs accept more new Medicare patients (86.2%) than MSAs (78.8%)

2014 Georgia Physician Workforce Data Book

# All Active Full Time Equivalent Georgia Physicians Rate Per 100,000 Population by Primary Care Service Area (PCSA)

Map 2

**Top 3 PCSAs**

- 31—Columbia, Lincoln, and Richmond (340.3 per 100,000)
- 22—Fulton (310.8 per 100,000)
- 75—Thomas (310 per 100,000)

**Bottom 3 PCSAs**

- 95—Charlton (24.5 per 100,000)
- 66—Dooley and Macon (23.5 per 100,000)
- 85—Berrien (14.9 per 100,000)

**PCSA Per 100,000 Rate Distribution**

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

Georgia has 96 Primary Care Service Areas (PCSA). The goal of PCSAs is to provide information about primary care resources and populations within small standardized areas that reflect patient utilization patterns.

- Georgia has 160.5 physicians per 100,000 population
- Over 79% (76) of the PCSAs in Georgia have less than 149 physicians per 100,000 population. Fifteen PCSAs have between 150 and 224 physicians per 100,000 population
- Four PCSAs have between 225 and 324 physicians per 100,000 population and 1 PCSA has between 325 and 350 physicians per 100,000 population

## All Active Georgia Physicians Age Distribution Over Time

Chart 7

### Physician Age Distribution Over Time

	2006	2008	2010	2014
34 and Below	11.6%	7.2%	4.2%	2.3%
35-39	15.2%	14.5%	15.8%	11.1%
40-44	15.5%	14.8%	12.3%	14.6%
45-49	16.7%	16.3%	15.0%	15.2%
50-54	15.4%	16.5%	16.1%	14.4%
55-59	11.0%	12.1%	14.5%	14.7%
60-64	7.1%	8.2%	10.0%	12.4%
65 and Above	7.6%	10.4%	12.2%	15.4%

- Since 2006 the percentage of the physicians below the age of 40 decreased by 50%
- Since 2006 the percentage of physicians over the age of 50 increased by 27.8%
- In 2006 11.6% of all physicians in Georgia were age 34 or less compared to 2014 where only 2.3% of the total physician population in Georgia was age 34 or less

- 65 and above is the largest age category for all physicians in Georgia
- 56.9% of all physicians in Georgia are over the age of 50s

## Physicians in Each Age Category Retiring in the Next 5 Years

## 2014 Georgia Physician Workforce Data Book

### All Active Georgia Physicians Race Distribution Over Time

Chart 8

#### Distribution of Race Over Time

- The percentage of total Asian physicians has steadily increased since 2006, rising from 7.2% of the physician population to 12.6% in 2014
- The percentage of total Black physicians has had a minor increase since 2006, rising from 13.4% to 14.9% in 2014. Physicians that self reported “Other” race category have also seen a similar increase

- The total percentage of White physicians has steadily decreased to 66.7% in 2014

### All Active Georgia Physicians Gender Distribution Overtime

Chart 9

#### Gender Distribution Over Time

- Since 2006 there has been a steady increase in the percentage of women in the physician workforce

## Physicians that Accept Current and New Medicaid and Medicare Patients

Chart 10

### Physicians that Accept Medicaid and New Medicaid Patients

- There has been a consistent 6% to 8% difference between those physicians that accept Medicaid patients and those who accept new Medicaid patients since 2008
- Since 2008 there has been a consistent increase in the percentage of physicians that accept Medicaid

- There has been a 5.1% increase in the percentage of physicians that accept Medicaid since 2010

Chart 11

### Physicians that Accept Medicare and New Medicare Patients

- There has been a consistent 4% to 5% difference between those physicians that accept Medicare patients and those who accept new Medicare patients
- In 2008 there was a decrease in both the percentage of physicians that accept Medicare and those that accept new Medicare patients

## Definition of Primary Care and Core Specialties

### Primary Practice

- *Family Practice or General Practice:* A family practitioner is qualified to care for the entire family. A family practitioner can be board-certified and have training in a variety of subjects including Obstetrics and Gynecology, Pediatrics, Internal Medicine and Psychiatry. This specialty was more common in years past but can still be found to treat the entire family.
- *Internal Medicine:* An internist is trained in the prevention, diagnosis, and treatment of adult diseases. An internist is not a surgeon. There are several sub-specialties an internist can have, including: specializing in a particular organ, like the lungs or the kidneys, a particular disease, like diabetes, or a particular age group, like the elderly.
- *Pediatrics:* A pediatrician specializes in the overall well-being of children. Most pediatricians treat children from birth until adolescence or about 14 years old. Pediatricians can have sub-specialties such as surgery or pediatric cardiology.

### Core Specialties

- *Emergency medicine:* An emergency medicine specialist diagnoses and treats unforeseen illness or injury. It encompasses a unique body of knowledge including the initial evaluation, diagnosis, treatment, coordination of care among multiple providers, and disposition of any patient requiring expeditious medical, surgical, or psychiatric care.
- *General Surgery:* General surgery is a discipline that requires knowledge and familiarity with a broad spectrum of diseases that may require surgical treatment. Technical proficiency in the performance of core operations/procedures, clinical knowledge, including epidemiology, anatomy, physiology, clinical presentation, and pathology (including neoplasia) of surgical conditions.
- *Obstetrics and gynecology (OB/GYN):* OB/GYN medicine is a broad and diverse branch of medicine, including surgery, management of the care of pregnant women, gynecologic care, oncology, and primary health care for women. Most OB/GYNs are generalists and see a variety of medical conditions in the office, perform surgery, and manage labor and delivery.

2014 Georgia Physician Workforce Data Book

# All Active Georgia Full Time Equivalent Family Medicine Physicians Rate Per 100,000 Population by Primary Care Service Area (PCSA)

Map 3

### Top 3 PCSAs

- 5—Union (74.6 per 100,00)
- 43—Chattahoochee, Harris, Marion, Muscogee, and Talbot (55.6 per 100,000)
- 55—Candler (50.1 per 100,000)

### Bottom 3 PCSAs

- 51—Scriven and 95—Charlton (11.3 per 100,000)
- 36—Jasper and Newton (11.1 per 100,000)
- 83—Clinch (0 per 100,000)

### PCSA Per 100,000 Rate Distribution

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

- Georgia has 22.1 family medicine physicians per 100,000 population
- Over 45.8% (44) of the PCSAs in Georgia have less than 22 family physicians per 100,000 population
- Nine counties have no family medicine physicians
- 74 counties have between 3 and 22 family physicians per 100,000

## 2014 All Active Georgia Family Medicine Physicians Age Distribution

Chart 12

### Family Medicine Age Distribution

	Percentage of Physicians
34 and Under	1.0%
35-39	8.0%
40-44	13.4%
45-49	18.6%
50-54	12.4%
55-59	13.0%
60-64	13.9%

Table 7

### Family Medicine Physicians in Each Age Category Retiring in the Next 5 Years

34 and Below	35-39	40-44	45-49	50-54	55-59	60-64	65 and Above
0.0%	0.0%	0.9%	0.8%	1.9%	3.6%	12.0%	42.0%

- The largest age category for family medicine physicians is 65 and Above (19.5%)
- The second largest family medicine category is 45 to 49 (18.6%)
- 58.9% of family medicine physicians are over the age of 50
- Only 9% of family medicine physicians are under the age of 40

## 2014 All Active Georgia Family Medicine Physicians Race Distribution

- The two largest age categories are White (56.2%) and Black (17.6%), accounting for 75.8% of all family medicine physicians

Chart 13

### Family Medicine Race Distribution

## 2014 Georgia Physician Workforce Data Book

### 2014 All Active Georgia Family Medicine Physicians Gender, Medicaid and Medicare

Chart 14 Family Medicine Gender Distribution

- Women make up 33.7% of the family medicine physician population
- Family medicine physician gender distribution is similar to the overall physician population gender distribution

- The percentage of family medicine physicians willing to accept Medicaid patients and new Medicaid patients is less than the percentage of all physicians in Georgia

Chart 15 Family Medicine Physicians that Accept Medicaid and New Medicaid

Chart 16 Family Medicine Physicians that Accept Medicare and New Medicare

- The percentage of family medicine physicians that accept Medicare and new Medicare is on par with the percentage of all physicians that accept Medicare and new Medicare
- Family medicine physicians that accept new Medicare is approximately 5.7% more than the percentage of all physicians in Georgia

2014 Georgia Physician Workforce Data Book

# All Active Georgia Full Time Equivalent Internal Medicine Physicians Rate Per 100,000 Population Primary Care Service Area (PCSA)

Map 4

**Top 3 PCSAs**

- 60—Laurens and Treutlen (54.6 per 100,00)
- 65—Crisp (50.6 per 100,000)
- 79—Tift and Turner (48.5 per 100,000)

**Bottom 3 PCSAs**

- 35-Putnam (1.8 per 100,000)
- 80-Cook (0.5 per 100,000)
- 59-Wheeler, 61-Telfair, 69-Stewart and Webster, 72-Miller and Seminole, and 85-Berrien (0.0 per 100,000)

**PCSA Per 100,000 Rate Distribution**

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

- Georgia has 23.3 internal medicine physicians per 100,000 population
- Over 76% (73) of the PCSAs in Georgia have less than 23 internal medicine physicians per 100,000 population
- 31 counties have no internal medicine physicians
- 93 counties have between 0.5 and 23 internal medicine physicians per 100,000

## 2014 All Active Georgia Internal Medicine Physicians Age Distribution

Chart 17 Internal Medicine Age Distribution

- The largest age category for internal medicine physicians is 45-49 (17.7%)
- The second largest internal medicine category is 40-44 (15.9%)
- 52.3% of internal medicine physicians are over the age of 50
- Only 14.1% of internal medicine physicians are under the age of 40

Table 10

### Internal Medicine Physicians in Each Age Category Retiring in the Next 5 Years

34 and Below	35-39	40-44	45-49	50-54	55-59	60-64	65 and Above
0.0%	0.0%	0.2%	0.4%	1.9%	5.7%	15.0%	41.2%

## 2014 All Active Georgia Internal Medicine Physicians Race Distribution

- The largest race categories are White (52.0%) and Black (21.5%), accounting for 71.7% of all internal medicine physicians

Chart 18 Internal Medicine Race Distribution

2014 Georgia Physician Workforce Data Book

2014 All Active Georgia Internal Medicine Physicians Gender, Medicaid and Medicare

Chart 19

Internal Medicine Gender Distribution

- Women make up about one-third (34.9%) of the internal medicine physician population

- The percentage of internal medicine physicians willing to accept Medicaid patients and new Medicaid patients is less than the percentage of all physicians in Georgia
- Internal medicine physicians accept new Medicaid patients at approximately 10.2% less than the percentage of all physicians in Georgia

Internal Medicine Physicians that Accept Medicaid and New Medicaid Patients Chart 20

Chart 21

Internal Medicine Physicians that Accept Medicare and New Medicare Patients

- The number of internal medicine physicians willing to accept Medicare and new Medicare patients is similar to the percentages of all Georgia physicians
- Internal medicine physicians that accept new Medicare is approximately 5.7% more than the percentage of all physicians in Georgia

2014 Georgia Physician Workforce Data Book

# All Active Georgia Full Time Equivalent Pediatric Physicians Rate Per 100,000 Population Primary Care Service Area (PCSA)

Map 5

**Top 3 PCSAs**

- 9-Franklin (44.0 per 100,000)
- 31-Lincoln, Columbia, and Richmond (21.0 per 100,000)

**Bottom 3 PCSAs**

- 74-Grady (0.9 per 100,000)
- 66-Dooly and Macon (0.3 per 100,000)
- \*23 PCSAs listed below

**PCSA Per 100,000 Rate Distribution**

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

0-8  
9-17  
18-26  
27-35  
36-44

- Georgia has 12.6 pediatric physicians per 100,000 population.
- Over 78.1% (78) of the PCSAs in Georgia have less than 12.6 pediatric physicians per 100,000 population
- 57 counties have no pediatric physicians
- 65 counties have between 0.2 and 12.6 pediatric physicians per 100,000

\* PCSAs with 0.0 pediatric physicians per 100,000: 6-Towns; 12-Lumpkin; 28-Hart; 29-Elbert; 30-Wilkes, and Taliaferro; 32-McDuffe, Warren, and Glascock; 33-Hancock; 51-Screven; 54-Jenkins; 55-Candler; 56-Tattnall and Evans; 57-Emanuel; 59-Wheeler; 61-Telfair; 70-Randolph and Quitman; 71-Early; 73-Decatur; 80-Cook; 81-Brooks; 83-Clinch; 84-Lanier; 85-Berrien; 95-Charlton.

## 2014 Georgia Physician Workforce Data Book

### 2014 All Active Georgia Pediatric Physicians Age Distribution

Chart 22

#### Pediatric Age Category Distribution

- The largest age category for pediatricians is 45-49 (16.6%) with 40-44 being a close second (16.3%)
- Pediatricians 40-49 account for 32.9% of the population
- 49.5% of all pediatricians are over the age of 50

### Pediatric Physicians in Each Age Category Retiring in the Next 5 Years

Table 12

34 and Under	35-39	40-44	45-49	50-54	55-59	60-64	65 and Above
0.0%	0.5%	0.4%	0.8%	1.4%	5.6%	22.3%	36.4%

### 2014 All Active Geor-

- The two largest race categories are White (61.5%) and Black (19.4%), accounting for 81% of the pediatric physician population

Chart 23

#### Pediatric Race Distribution

2014 Georgia Physician Workforce Data Book

2014 All Active Georgia Pediatric Physicians Gender, Medicaid and Medicare

Chart 24

Pediatric Gender Distribution

- Women make up over half (61.1%) of the pediatric physician population

- The percentage of pediatric physicians willing to accept Medicaid patients and new Medicaid patients is less than the percentage of all physicians in Georgia
- Pediatric physicians accept new Medicaid patients at approximately 7.2% more than the percentage of all physicians in Georgia

Chart 25

Pediatric Physicians that Accept Medicaid and New Medicaid

Chart 26

Pediatric Physicians that Accept Medicare and New Medicare

- The percentage of pediatric physicians accepting Medicare patients and new Medicare patients is less than the percentage of all physicians in Georgia
- Approximately 19.3% of pediatric physicians accept new Medicare patients

2014 Georgia Physician Workforce Data Book

# All Active Georgia OB/GYN Physicians Rate Per 100,000 Population Primary Care Service Area (PCSA)

Map 6

### Top 3 PCSAs

- 53-Bulloch (24.5 per 100,000)
- 22-Fulton (17.3 per 100,000)
- 58-Montgomery and Toombs (16.4 per 100,000)

### Bottom 3 PCSAs

- 7-Rabun (0.2 per 100,000)
- 32-McDuffie, Glasscock, and Warren (0.1 per 100,000)
- \*28 PCSAs listed below

### PCSA Per 100,000 Rate Distribution

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

- Georgia has 7.9 OB/GYN physicians per 100,000 population
- Over 72.8% (70) of the PCSAs in Georgia have less than 7.9 OB/GYN physicians per 100,000 population
- 76 counties have no OB/GYN physicians
- 44 counties have between 0.1 and 7.9 OB/GYN physicians per 100,000

\*28 PCSAs with 0.0 OB/GYN physicians per 100,000: 6-Towns; 28-Hart; 29-Elbert; 30-Wilkes and Taliaferro; 33-Hancock; 35-Putnam; 45-Monroe; 49-Jefferson; 50-Burke; 51-Screven; 54-Jenkins; 55-Candler; 56-Tattnall and Evans; 59-Wheeler; 61-Telfair; 63-Bleckley; 66-Dooly; 69-Stewart and Webster; 70-Randolph and Quitman; 71-Early; 77-Worth; 81-Brooks; 83-Clinch; 84-Lanier; 85-Berrien; 86-Irwin; 89-Jeff Davis; 95-Charlton

2014 Georgia Physician Workforce Data Book

2014 All Active Georgia OB/GYN Physicians Age Distribution

Chart 27

OB/GYN Age Category Distribution

- The largest age category for OB/GYN physicians is 45-49(18%)
- The second largest OB/GYN category is 50-54 (16%)
- 54.3% of OB/GYN physicians are over the age of 50
- Only 13.6% of OB/GYN physicians are under the age of 40

Table 15 Physicians in Each Age Category Retiring in the Next 5 Years

34 and Below	35-39	40-44	45-49	50-54	55-59	60-64	65 and Above
4.3%	0.9%	0.0%	0.0%	0.0%	5.7%	18.6%	39.2%

- The 2 largest age categories are White (64.0%) and Black (26.9%), accounting for 90.9% of all OB/GYN physicians

Chart 28

OB/GYN Race Distribution

2014 Georgia Physician Workforce Data Book

2014 All Active Georgia OB/GYN Physicians Gender, Medicaid and Medicare

Chart 29

- Women comprise nearly one half (46.5%) of the OB/GYN physician population in Georgia
- Nationally women make up 85% of actively practicing OB/GYN physicians (Vassar, 2015)

- The percentage of OB/GYN physicians willing to accept Medicaid and new Medicaid patients is more than the percentage of all physicians in Georgia
- OB/GYN physicians accept new Medicaid patients at approximately 7.4% more than the percentage of all physicians in Georgia

Chart 30

OB/GYN Physicians that Accept Medicaid and New Medicaid Patients

Chart 31 OB/GYN Physicians that Accept Medicare and New Medicare Patients

- The number of OB/GYN physicians willing to accept Medicare and new Medicare patients is similar to the percentages of all Georgia physicians
- OB/GYN physicians that accept new Medicare is approximately 1.8% less than the percentage of all physicians in Georgia

2014 Georgia Physician Workforce Data Book

# All Active Georgia General Surgery Physicians Rate Per 100,000 Population Primary Care Service Area (PCSA)

Map 7

### Top 3 PCSAs

- 72-Miller and Seminole (26.8 per 100,000)
- 42-Heard, Troup, and Meriwether (17.0 per 100,000)
- 75-Thomas (13.4 per 100,000)

### Bottom 2 PCSAs

- 55-Candler (0.2 per 100,000)
- 51-Screven (0.1 per 100,000)
- \*23 PCSAs listed below

### PCSA Per 100,000 Rate Distribution

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSAs between 325-350 per 100,000

- Georgia has 5.6 general surgery physicians per 100,000 population
- Over 63.5% (61) of the PCSAs in Georgia have less than 5.6 general surgery physicians per 100,000 population
- 73 counties have no general surgery physicians
- 109 counties have between 0.1 and 5.6 general surgery physicians per 100,000

\*PCSA with 0.0 General Surgery physicians per 100,000: 3-Gilmer; 6-Towns; 8-Stephens; 30-Wilkes and Taliaferro; 33-Hancock; 45-Monroe; 49-Jefferson; 50-Burke; 54-Jenkins; 59-Wheeler; 63-Bleckley; 66-Macon and Dooly; 69-Stewart and Webster; 70-Randolph and Quitman; 71-Early; 77-Worth; 80-Cook; 81-Brooks; 83-Clinch; 84-Lanier; 85-Berrien; 86-Irwin; 95-Charlton

2014 Georgia Physician Workforce Data Book

2014 All Active Georgia General Surgery Physicians Age Distribution

Chart 32

General Surgery Category Age Distribution

- The largest age category for General Surgery physicians is 65 and above(20.1%)
- The second largest General Surgery category is 55-59 (15.1%)
- 64.3% of General Surgery physicians are over the age of 50
- Only 10.3% of General Surgery physicians are under the age of 40

General Surgery Physicians in Each Age Category Retiring in the Next 5 Years

Table 18

34 and Below	35-39	40-44	45-49	50-54	55-59	60-64	65 and Above
0.0%	0.0%	1.3%	1.2%	1.1%	2.1%	18.3%	53.5%

2014 All Active Georgia General Surgery Physicians Race Distribution

Chart 33

General Surgery Race Distribution

- The two largest age categories are White (78.8%) and Black (10.0%), accounting for 88.8% of all general surgery physicians

2014 Georgia Physician Workforce Data Book

2014 All Active General Surgery Physicians Gender, Medicaid and Medicare

Chart 34

General Surgery Gender Distribution

- Women make up 10.4% of the of general surgeon physician population

- The percentage of general surgeons willing to accept Medicaid and new Medicaid patients is more then the percentage of all physicians in Georgia
- General surgeons accept new Medicaid patients is almost 12% more than the percentage of all physicians in Georgia

Chart 35 General Surgery that Accept Medicaid and New Medicaid

Chart 36 General Surgery Physicians that Accept Medicare and New Medicare

- The number of general surgeons willing to accept Medicare and new Medicare patients is more than the percentages of all Georgia physicians
- General surgeons that accept new Medicare is approximately 16% more than the percentage of all physicians in Georgia

2014 Georgia Physician Workforce Data Book

# All Active Georgia Emergency Medicine Physicians Rate Per 100,000 Population Primary Care Service Area (PCSA)

Map 8

### Top 3 PCSAs

- 6-Towns (31.4 per 100,000)
- 75-Thomas (19.9 per 100,000)
- 91-Applying (18.5 per 100,000)

### Bottom 3 PCSAs

- 74-Grady (0.8 per 100,000)
- 10-Habersham and 87-Ben Hill (0.4 per 100,000)
- \*16 PCSAs listed below

### PCSA Per 100,000 Rate Distribution

- 52 PCSAs below 94 per 100,000
- 21 PCSAs between 95-149 per 100,000
- 18 PCSAs between 150-224 per 100,000
- 4 PCSAs between 225-324 per 100,000
- 1 PCSA between 325-350 per 100,000

- Georgia has 7.7 emergency medicine physicians per 100,000 population.
- Over 67.7% (65) of the PCSAs in Georgia have less than 7.7 emergency medicine physicians per 100,000 population
- 56 counties have no emergency medicine physicians
- 58 counties have between 0.1 and 7.7 emergency medicine physicians per 100,000

\*PCSA's with 0.0 Emergency Medicine physicians per 100,000: 3-Gilmer; 28-Hart; 30-Wilkes and Taliaferro; 33-Hancock; 48-Washington and Johnson; 59-Wheeler; 61-Telfair; 66-Macon and Dooly; 70-Randolph and Quitman; 71-Early; 72-Miller and Seminole; 81-Brooks; 83-Clinch; 84-Lanier; 86-Irwin; 95-Charlton
